LIDC-IDRI
1018 CT scans
218 scans with 1.25-mm slice spacing
331 nodules ≥ 3 mm marked by at least three of four radiologists (156 patients)
Excluded (n = 27)
• Marks merged from more than four readers (n = 1)
• Diameters differing by more than 5.0 mm between readers (n = 26)
304 nodules, 222 solid
50 solid nodules chosen by a fixed rule stratified by diameter (50 patients)
225 vessel candidates located automatically in 48 of the 50 scans with these nodules
54 chosen by a fixed rule stratified by diameter, no more than two per scan
Excluded (n = 11)
• Larger than the largest vessel (14.6–29.8 mm)
54 confirmed as vessel cross-sections by a radiologist (35 patients)
39 nodules (39 patients)
93 structures: 39 nodules and 54 vessels, 4.5–14.3 mm
48 patients; 26 contributed both
